

## TECHNOLOGY

- Let Bit Refinery power your Hadoop infrastructure with a simple monthly billing model helping you avoid capex and sticker shock from the other guys.
- We are the only provider offering a blend of Enterprise VMWare<sup>®</sup> and bare-metal Hadoop nodes.
- Bit Refinery offers optional managed services support which includes monitoring and system administration of any flavor of Hadoop.

## Bit Refinery... True Hadoop Infrastructure

Bit Refinery are experts in designing, configuring and maintaining enterprise class Hadoop environments on our hosted Hadoop infrastructure. Our hosted Hadoop platform provides our customers with private, dedicated Hadoop nodes, running on their own isolated network. This allows our customers to use the Hadoop technology just as they would in their own data center but without the significant hardware capex and resource expense typically associated with building a new Hadoop platform on-site.

### Bit Refinery vs Amazon EC2 - Costs (20 Node Cluster)

Services:	QTY	Bit Refinery	Amazon
Data node (64 GB Ram)	20	\$6,000	\$10,248
Master node	3	\$1,200	\$1,540
Edge node	1	\$270	\$155
Managed firewall	1	\$40	\$50
Internet bandwidth (Mbps)	30	Included	\$873
EBS storage (1024 GB)	200	N/A	\$11,255
<b>Monthly Total</b>		<b>\$7,510</b>	<b>\$24,121</b>

\* Using EBS Storage and r3.2xlarge instance

### Bit Refinery vs Amazon - Services

Services:	Bit Refinery	Amazon
Optional Hadoop install	✓	
Purpose-built infrastructure	✓	
Private true Hadoop cluster	✓	
Predictable billing	✓	
Bare-metal Hadoop servers	✓	
Managed services	✓	
Includes 24/7 monitored infrastructure	✓	
<b>Charge extra for support</b>		✓
High speed network	✓	✓
Multiple data centers	✓	✓
